

Dominion Budget Presented Monday

For Assistance to Coal and Iron Farmers

Activities of business and industries throughout Canada, the budget introduced by Premier Bennett last Monday is a most popular one.

Faced with a deficit of over seventy-five million dollars the Premier, who is acting Minister of Finance, fearlessly took the necessary steps to provide for making ends meet, and, in doing so, he placed the burden on those who bear best ability to pay.

Naturally all will condemn or praise the budget from a more or less personal or provincial standpoint. Looking at it from this angle Alberta has just reason to look upon it with favour, as it provides for the absorption of 5 cents a bushel on freight rates on grain by the Dominion Government and also gives encouragement to the coal industry both through the tariff and bonus.

The following is a list of the outstanding features of the budget:

Postage rates on ordinary letters increased to three cents. Rate on newspapers and periodicals also increased.

Subsidies totalling \$1,800,000 will be paid for the coal industries of the Maritimes and Western Canada. Subsidy on Alberta coal shipped to Manitoba will be extended as far East as Fort Francis and Sioux Lookout.

An increase in the sales tax to four per cent. from one per cent. The Dominion Government will pay five cents per bushel of the cost of transporting all wheat produced in Western Canada. This is a temporary measure for one year.

Tariff revisions affect 200 bearing items.

All goods collected on entry to certain goods entering Canada.

Minimum food products such as fresh meats, hams, cheese, powdered milk, canned fruit and oranges, will enter under increased tariffs.

Used automobiles are prohibited of entry, save as settlers' or facts or travelers' vehicles.

Autos are divided into three classes for duty purposes up to \$1,200 in value; from \$1,201 to \$2,100 and above \$2,100. On the first there are no changes in duty; on second general tariff is raised from 27 1/2 per cent. to 30 per cent. and on the third group intermediate and general rates are increased to 30 per cent. and 40 per cent. respectively. Duties on anthracite coal, bituminous coal and coal screenings and charcoal are increased.

Leather schedule secures increased rates under all tariffs.

Magazines and periodicals are made subject to a specific duty of 15 cents a pound, with exception of an exempted list.

Provision is made for imposition of excise duties upon products of a manufacturer who uses tariff rates to increase prices of his product.

Goods imported from a country not a signatory to the Treaty of Versailles may be forfeited.

Further safeguards against

Two Town Teams Leading in Five Roses

Three Good Games Played During Past Week

During the past week three interesting football games in which the two Redcliff teams figured prominently, took place. The results were a loss and a win for the Diamond D's and a decisive win for the Brick and Coal.

In the game last Friday between the Diamonds and the Legion, the Glassers once more showed that they can still come from behind and finish strong. At one stage the score was 4 to 1 against them but at the finish it was 4 to 3 and it might very easily have been a tie but for the decision of the referee had upon the players. The Review has always maintained that Goldie was a good referee but on this occasion we must admit he slipped a little.

The climax came towards the end when the Glassers were trying hard to equalize and were making good headway. A cally player made a foul which every fan on the field but the referee saw. It was more than a foul as the player in question actually laid hands on his opponent. Nothing so dishonourable a team as to be handed out a raw deal. Consequently from this on the Glassers played as though they were they were playing twelve men. However it may be said that on the whole the callys put slightly the bet play. This was accounted for largely by the selfishness of the glass plant centre forward who repeatedly hung onto the ball and lost it while his own wing men were in easy passing distance.

The game ended four to three for the Callys. It was a league game.

On Tuesday evening the Brick & Coal played the Legion in the Hat in the Five Roses Cup and had an easy victory of 4 goals to 1. In this game the Bricks played the clock work all the way through and if it had not been that their opponents scored on one of their two penalty kicks, the Bricks would have shut them out entirely. In the second penalty Thomson made a most sensational save. In a word the Brick had it all over the Legion like a circus tent.

Last night's game between the Glass Plant and the Callys, in the Five Roses cup fixture resulted in a win for the Glassers by 3 goals to 2. So evenly matched were the two teams that the first period was scoreless and both team put up some nice exhibitions, resulting in some close calls.

In the start of the second half the Glassers showed up much better than the visitors and got three goals in short order. These were all the result of nice team play. Toward the finish the Callys were much on the

dumping are provided. Income tax applicable to income of corporations and joint stock companies is increased from 8 to 10 per cent.

Exemption for persons at present entitled to \$3,000 will be raised to \$3,500.

Dominion contributions to old age pension scheme will be increased to 75 per cent.

FOOTBALL SCHEDULE

The following is the schedule to the football games in the local league and Five Roses fixtures up till June 19th.

Legion United vs Callys; Tuesday, May 19th; League Brick & Coal vs Legion United; Wed, May 27th; League Callys vs Dominion Glass.

Friday, May 29th; League Legion United vs Brick & Coal; Tuesday, June 2nd; Five Roses Dominion Glass vs Callys.

Wed, June 3rd; Five Roses Callys vs Legion United.

Friday, June 5th; Five Roses Brick & Coal vs Dom. Glass.

Monday, June 8th; League Dom. Glass vs Legion United.

Thursday, June 11th; League Callys vs Brick & Coal.

Friday, June 12th; Five Roses Dom. Glass vs Brick & Coal.

Monday, June 15th; League Brick & Coal vs Callys.

Thursday, June 18th; Five Roses Legion United vs Dom. Glass.

Friday, June 19th; Five Roses All games will be played on the grounds of the first mentioned team.

The Girls' soft ball team has again organized for the season and they have issued a challenge to meet the married men any time their wives will let them out for an evening.

Ladies' football teams have been organized in both the Glass plant and the Brick & Coal plant. They will play a friendly game next Tuesday evening. Those who saw them practising say the game will be well worth seeing.

aggressive, forcing three corners in rapid succession, and finally scoring two goals. In the meantime the Glass plant had notched their third counted on a nice place from the corner.

So far this season the Bricks have put the McGeehan cup in cold storage and the two town teams are now shaking hands on the top rung of the Five Roses ladder.

* ADDITIONAL LOCALS *

Last week-end crop reports were to the effect that Alberta has the best crop prospects of the three prairie provinces. The highest favors go to the Peace River area.

Good progress is being made on the work of remodelling the new L.O.O.F. block here, and it is expected that both the Oddfellows and Rebekahs will hold meetings this month in their new quarters. Local Oddfellows members have been doing most of the work and are making a good job of it.

At the regular meeting of the School Board held last Monday evening the regular monthly bills were approved for payment and arrangements made for the holding of the midsummer examinations in high school. Mr. King and Miss Broadfoot were appointed presiding officers for the high school examinations.

Last Sunday afternoon one of the worst wind storms experienced here for some time blew in, through and around town, carrying with it a dense cloud of dust through which it was impossible to see more than a few yards. The wind followed the hottest day we have had this season up to that time. Fortunately no serious damage was done.

There are no doubt many in this district who will remember what took place fifteen years ago last Tuesday, especially those who were members of the 3rd C.M.R.s on the 2nd of June 1916 to battle of Sanctuary Wood, in which so many Canadians lost their lives, took place. Among the casualties were several from Redcliff but of all the Redcliff boys who took part in this engagement H. J. Cox is about the only one still living here. In rehearsing the battle Herb said he was buried three times and received wounds which rendered him unconscious for several days. When he came to he was in a hospital in England.

Change in System For Departmental Exams

Promotion in Grades 8 and 9 Left with teacher

The announcement made last weekend by Hon. Perrin Baker, Minister of Education, to the effect that the old system of departmental examinations for grades 8 and 9 would be eliminated this year, does not appear to meet with the approval of either the teachers or the press of the province.

The Calgary Herald thinks this move is open to serious objection as the wholesale promotion of the pupils of these two grades without any restrictions whatsoever cannot but result in the elimination of all standards and in the promotion of great numbers of unprepared students.

The Calgary Albertan says:

"Expressed in its worst terms the new ruling may mean that some teachers will have to choose between passing unqualified pupils into high school on one hand and dismissal for themselves at the end of the year on the other. . . . Removal of a check upon the teacher's work and removal of the shield which in the past has protected the teacher from the attacks of disgruntled parents".

According to Mr. Baker's announcement the regular departmental examination paper for these grades have been set and pointed. These papers are to be sent to all schools as usual but instead of sending the pupils paper to Edmonton for marking this will be done by the local teacher if the pupils will not be required to write instead of being recommended for promotion. In this way the pupils will not be required to pay the usual fee.

The Bricks and the Glassers play next Monday

Harry Lindsay a pioneer of the Box Springs district, died in Medicine Hat last Monday after an lingering illness.

Progress Being Made For New Industry

Building Being Fitted For Installing Machinery

During the past week considerable work has been done on the old Ornamental Iron which is being fitted up for a new industry in town. The inside of the building has been cleaned up and new glass has been put in the windows.

Those interested in the proposed new industry state that they expect to have everything ready to commence operations within the next few months and that by fall they hope to have 25 or 30 men employed.

The Review understands that in the meantime arrangements are being made to have the necessary equipment installed.

Swimming Pool Meeting June 12th

All Interested Are Invited to be At The Meeting

The annual meeting of the Swimming Pool is called for Friday night, June 12th at 8 o'clock, in the Legion club room.

The swimming pool is the best and cheapest entertainment our children have and it is most desirable that we have it running this season. Every parent who has children who patronize the pool is especially invited to be present, as well as all who are interested in this community movement. Do not forget the date, June 12th at 8 p.m.

Life's Work Is Hobby, Too

Mechanics are a hobby as well as the life's work of Henry Blaine Bowen, chief of motive power and rolling stock, Canadian Pacific Railway, who has an up-to-date machine shop in the basement of his Montreal home. Here he has invented a number of tools now in use throughout the company and built a series of model stationary and marine engines, to the great delight of his three sons. He came into particular prominence recently as the builder of the C.P.R.'s new six-cylinder, "5000" type, multi-pressure locomotive, the biggest and most powerful of its kind in the world, and measures the American continent destined for heavy duty in the Rocky Mountains. The pictures show the workshop, in which so many of Mr. Bowen's inventions are accepted. He finds himself that it is the most complete private plant in Canada. In fact, Mr. Bowen is seen operating a milling machine, which he built with his own hands. The model marine engine, shown lower right, is the latest product of the hobby-shop. Although it is only four inches high and could almost be held in a clear hand, it completes in a minute what a full-size engine takes an hour to do. Bowen built them both.

Canada and World Disarmament

During this present period of world-wide human depression some people, good people, are apt to thoughtlessly remark that the only way out will be another great war; that such a struggle will be the ultimate outcome of the world's existing difficulties. Such a statement should be the last to pass the lips of any person. Another war, instead of being a cure, would be the final world catastrophe.

Many contributing causes there may be to the economic trials of today, but the main reason of all the trouble is to be found in the Great War, 1914-1918. That terrific struggle laid the foundations for what has since taken place. In fact, all students of history fully realize that our present experiences are but a repetition of those which followed the Napoleonic wars. Another great war would have exactly the same results, only worse, because modern world conditions only serve to intensify and prolong such disturbances when they do occur.

Instead, therefore, of even thinking "war," the people of all nations should think and talk of nothing but permanent peace, and direct all their energies to the consummation of that ideal.

What is the great financial burden resting on the shoulders of the Canadian people today? It is the debt created by the Great War. The public debt of Canada created in the upbuilding of this Dominion from before the time of Confederation down to 1914 calls for annual interest payments of only \$12,893,000, or only 9 1/2 per cent. of our national expenditures, and approximately \$1.30 per head of our population. On the other hand, interest charges on the public debt created since 1914 amount to \$108,867,000, or 27 1/2 per cent. of our annual expenditures, and more than \$10.00 per head of population in each and every year.

That this is not all of the war burden. In addition to this 27 1/2 per cent. interest on the war debt, Canadians are required to contribute 12 per cent. of all expenditures for services arising out of the war, such as pensions, after care of soldiers, etc. That is, out of every \$100 expended by the Government of Canada each year, \$39.12 will have been expended on the war. This is the burden which lies the hands and cripples the efforts of our national government.

Of every \$100 expended by the United States \$60.00 is spent because of war, past, present and future. The war expenditures of Great Britain are in like proportion, or possibly even heavier.

In a recent speech before the International Chamber of Commerce, meeting in Washington, President Hoover declared that the present world expenditure is largely due to "the destruction of life and property, the great tax burdens, and the social and political instability which resulted from the Great War," and he declared that one major accomplishment which international co-operation could effect in reducing tax burdens, removing a primary cause of unrest, and establishing greater confidence for the long future, was "the limitation and reduction of armaments." President Hoover proceeded to back up his assertion with these startling facts and figures:

"The world expenditure on all arms is now nearly five billions of dollars yearly, an increase of about 70% over that previous to the Great War. We stand today with nearly 5,000,000 men actively under arms and 20,000,000 more in reserve. These vast forces, greatly exceeding those of the pre-war period, still are to be demobilized, even though twelve years have passed since the Armistice was signed, because of fear and of inability of nations to co-operate in mutual reductions. Yet we are all signatories to the Kellogg-Briand Pact, by which we have renounced war as a method of national policy, and agreed to settle all controversies by pacific means." Nevertheless, in the face of such a declaration from President Hoover, and also in the face of a huge national deficit of over \$800,000,000 which is enforcing economies in practically every department of government, the United States budget for 1932 provides for an increase of \$20,000,000 in prospective outlay on military expenditures.

Canada, too, is a signatory to the Kellogg-Briand Peace Pact, and as such this Dominion is steadily reducing its expenditures for defence purposes; we have no offensive armaments. Expenditures for National Defence by Canada are the smallest of any country in the world having anything like the same population or degree of wealth. They total only 0.06% of our annual expenditures. In other words, for every two dollars per head of our population.

While, therefore, this Dominion is not at all blameworthy for the present state of world armament, the Canadian people should be staunch supporters of further disarmament everywhere as a step towards permanent peace. As a people we cannot remain the aggressors to the attitude of other nations, and unless a general reduction in armaments takes place another world tragedy will be enacted, and into it we may again be drawn as active participants, and in any event cannot escape its disastrous effects.

Canada on Air Highways

"Canada is on the air highways which will connect the four great centres of population—Europe, Asia and North America—and it is up to Canadians to see that the Canadian sections of these great air routes are developed and operated by Canadians," said General Sir Arthur Currie, president of the Aviation League of Canada, in an address at Windsor, Ontario.

Fragments of cotton cloth 5,000 years old, found in the ruins of a town in India, were examined recently, and the fibres were found similar to a kind of cotton still grown in India.

Unearth Ancient Treasures

Valuable Discoveries Made in Kish By Oxford-Field Museum Expedition

Jewelry worn at the Court of Nebuchadnezzar, the magnificent sculptures of the Sasanian period, and royal tombs over 5,000 years old have been discovered by the Oxford-Field Museum Expedition excavating at Kish, near the site of old Babylon. Stephen Langdon, Professor of Assyriology, Oxford University, director of the expedition, has sent a report to Sir Charles Mawson, author of the Old Testament, who states that the jewelry is said to be worth several thousands of pounds. The expedition is working on three separate strata covering three periods of history. Sumerian sculpture, dating from about 2500 A.D., was found on the top layer above the great Temple of Nebuchadnezzar. The find of treasure from the Nebuchadnezzar period is sensational and includes solid gold ornaments.

"It will be of great interest to know just how far we have found because the time of Nebuchadnezzar is one about which we are learning a great deal from recent discoveries and excavation is supporting the old biblical narrative to an extraordinary extent," Sir Charles says.

Below the Nebuchadnezzar Temple have been found a further series of Sumerian royal tombs. These are about 5,500 years old and the expedition is just beginning to explore them. Written tablets and cuneiform writings have been recovered which will probably shed light on the history of the world. Sir Charles Mawson, especially interesting to know that the date of the floods has now been fixed at 2,400 B.C., so that these tablets are probably older still.

DRAPERIES MADE NEW

When we resumed housekeeping a month ago I found my draperies had been ruined by the rain. I had them taken out on the line, hoping to remove the creases. Then I forgot to take them down and they were badly faded and sun-spotted. I had them taken to a dry cleaner, but they were ruined. I had them taken to a dry cleaner, but they were ruined. I had them taken to a dry cleaner, but they were ruined.

Industrial Manitoba

Industry Gradually Taking Priority Over Agriculture in the Province

Bearing upon the recent statement of J. M. Davidson, of the Manitoba Development Board of Manitoba, that industry is gradually taking priority over agriculture in the province, it is pointed out that Manitoba is rich in natural resources, having more than 400,000 acres of reserves, 100 square miles of water surface, and 20,000 square miles of water surface. The province is also extremely rich in minerals, and non-metallic minerals. With an annual production of more than \$155,000,000, moreover, Manitoba has 130 industrial plants having yearly pay-roll of \$35,000,000.

Persian Helm—the unrivaled toilet requisite. Essential to every dainty woman. Gives charm and beauty to the complexion. Softens and beautifies the skin. Makes hands luxuriously white. Cools and refreshes. Relieves roughness. Ideal for toilet feminine distinction. Specially fragrant. Swiftly absorbed into the tissue, leaving no stickiness. Persian Helm invariably creates a subtle elegance and charm.

Co-Operative Wool Growers

Wool Receiving Warehouse To Be Opened At Regina In Prairie

The Canadian Co-Operative Wool Growers have completed arrangements for wool receiving warehouses at Regina, Manitoba, and at the Prairie, Man. to receive shipments of wool from June 1 to August 31. A warehouse has been sent to the wool producers requesting that they forward their shipments to arrive at the warehouses between these dates. The wool that the volume of wool handled in the past year was 3,028,205 pounds more than the objective for the year, which was 4,000,000 pounds.

Apples On Century-Old Tree

There will be applied this year on the 106-year-old Hudson's Bay Apple tree, on the lower part of the barometer at Vancouver, Wash. The tree grew from a seed planted by a member of the Hudson's Bay Company in 1724, and has since been a great success in bearing. A. A. Quamberg, horticulturist, said it very likely will bear a large crop this season.

More than 21,000,000 acres in Argentina were planted to wheat last season.

Week End Cruises

Cunard Line Will Inaugurate Week-End Cruises From New York To Nova Scotia

In an effort to further increase the popularity of Nova Scotia a tour of the country among Americans the Cunard Line announces that the new famous "Week-end Cruises" scheduled for the months of July, August and September, will include a call at a Nova Scotia port.

The statement that was issued by Arthur Handley, general passenger traffic manager of the Cunard Line in Canada, also pointed out the fact that not only will the "Week-end Cruises" call there, but those of the special summer cruises under the patronage of the National Yacht, will also make Halifax a port of call. The co-operation of the National Yacht Association has been secured and every effort will be made to see that passengers on these cruises are given as much pleasure as possible to view the many attractions which the maritime province have to offer.

"This will be the first time," said Mr. Handley, "that three giant express liners of the size of the 'Bergensfjord', 'Aquitania' and 'Mauretania' have called at Halifax, except that the 'Aquitania' and 'Mauretania' occasionally call at the port during the war. The first sailing of the 'Week-end Cruises' will be on August 27th with the 'Aquitania', July 3rd, from New York. These cruises will be carried on throughout the summer until the sailing of the 'Mauretania' leaving New York on September 18th, while the National Yacht cruises will commence on June 27th with the 'Tasmania' and finish with the sailing from New York on August 31st of the 'Aquitania'.

Until July there are scheduled four 'Week-end Cruises' from New York to Nova Scotia. The first will be the 'Aquitania', leaving New York on May 15th, calling at Nassau in the Bahamas Islands. The third cruise is that of the 'Bergensfjord', leaving New York on May 29th and calling at Bermuda, to be followed by a cruise of the 'Mauretania' on June 11th to Nassau. The 'Week-end Cruises' to Nova Scotia will then follow. The cruise of the 'Aquitania' is also unique in that it is the largest liner ever to visit Bermuda."

These week-end cruises, the first of which have proven so popular, are drawing capacity bookings. On board the attractions of the 'Aquitania' and 'Mauretania' lectures, deck sports, and every type of ship entertainment and the extremely low rates available.

"The reason for these cruises is to familiarize the vast number of people on this side of the Atlantic who have never had the pleasure of sailing in an ocean liner, and to give them the opportunity to visit with little or no time away from their business."

The calls at Nassau and Bermuda allow passengers to do some sight-seeing or enjoy the local attractions such as trips in the glass-bottomed boats at Paradise Beach, and sea bathing.

Officials of the Cunard Line expect that the call at the Nova Scotia port at the best time of the year will enhance the popularity of these week-end cruises.

A Consistent Of Concrete

Portland cement is used as one of the constituents of concrete for the construction of foundations, dams, bridges, and buildings. It is also used in concrete masonry, and for many other purposes. It is one of the most important of our structural materials. Materials suitable for the manufacture of Portland cement occur in all but one of the provinces of Canada.

National Enrolment May Be Compulsory

Bill Introduced in Senate After Registration of People in Canada

Compulsory registration of all persons in Canada over the age of 16 years would be provided for under a bill introduced in the Senate by Senator J. B. Chapman. Registration would be followed by the issue of a certificate with the person's photograph and signature on it. Certain exceptions to the universal registration would be allowed. Cloned men, members of the Royal Canadian Mounted Police or any provincial or municipal police force, inmates of asylums for the insane or mentally defective, inmates of penitentiaries or prisoners of war, or other institutions as might be excepted by the minister in charge of the administration of the act would not have to register.

The act would apply to everyone in Canada, including British subjects and aliens. All would have to register within a named time and all persons subsequently reaching the age of 16 would have to register within one week of their 16th birthday. A person would be required to state his nationality and, if a British subject, where he became so by birth or naturalization. He would also submit a photograph which would be attached to his certificate.

New Use For Music

Elgar's Rhapsody March Chosen Brooklyn Store At Closing Time

You may not have realized it, but one of the matters to which department-store executives have devoted a great deal of thought is how to get rid of their customers at closing time without actually pushing or shoving them out. The solution has been found in the use of music. A gentleman who was derided late one afternoon into Abraham & Straus, in Brooklyn, New York, reports a neat way they have of doing it. He saw it work. At five-thirty a gong rang; immediately from loudspeakers scattered along the walls issued the rousing strains of Elgar's "Rhapsody March." Ladies, gentlemen, young men, and in no time were swarming briskly out the glass doors. The floorwalker he questioned, was enthusiastic about the idea, said it was the best they'd ever had for the purpose, and, incidentally, paid a high tribute to Elgar. His march, the floorwalker said, cleared the store faster than anything else they had been able to find by extensive experiments.

For Scolds Or Burns—Dr. Thomas' Eucalypti is a standard remedy for the prompt treatment of scalds and burns. It soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, abrasions, and sores, as well as for relieving the pains arising from the treatment of various diseases. A bottle in the house and stable saves many a doctor's and veterinarian's fee.

The iron ore fields of Lapland, which is entirely north of the Arctic Circle, are among the most valuable in the world. Their ore averages from 58 to 70 per cent. of iron.

World's Grain Exhibition

Spain Making Arrangements To Participate In Conference

Though Spain is a very busy just now reorganizing its national administration, the importance of the World's Grain Exhibition and Conference to be held at Regina, July 25 to August 26, 1932, has not been lost sight of.

A few days ago the headquarters' office of the Exhibition and Conference was advised by the General Director of Agriculture of the Spanish Ministry of National Economy that a special committee of cereal agriculture had been appointed to devote itself to the definite organization of participation by Spain in the World's Grain Exhibition and Conference.

Spain has a particular interest in the forthcoming world-wide grain exhibition and conference in that it is a preponderantly agricultural country. Its productive area is calculated at 114,000,000 acres of which, last year, nearly 12,000,000 acres were sown in wheat, 5,000,000 acres in barley, 2,000,000 acres to oats and 1,500,000 to rye.

Several countries have now officially accepted the invitation to be represented at the Exhibition and Conference, namely: Italy, Peru, Yugoslavia, Guatemala, New Zealand, Czech-Slovakia, the Netherlands, Hungary, Poland, Spain, Portugal, Switzerland, Estonia, the Philippines, the Argentina and Spain.

Plans Round Trip

Flight Over Ocean

Commander MacMillan and Pilot Will Attempt Hop In June

In the role of North Atlantic flyers whose goal is the first round trip crossing of the North Atlantic by airplane, Commander Donald B. MacMillan, veteran explorer of the Arctic, will attempt to fly back and forth between Boston and London this summer.

A swift monoplane, a Lockheed Vega, the means of ship in which many trans-continental speed records have been set, will be used. A Los Angeles flyer, Charles F. Smith, will pilot the ship.

The take-off is set for June 21.

Take Long Walks Fat Men are Told

How can you walk off your fat if you haven't any energy to do it? You can take off fat with freedom. Stays if you will take one-half teaspoon in hot water every morning before breakfast, modify your diet and exercise regularly.

There are six different salts in potassium that your system must have if you are to enjoy good health. While you are losing fat you ought to be gaining in vigor, energy, vitality and power of endurance.

That means that soon you will be able to walk many miles without fatigue and enjoy every step you take.

Drug Stores all over Canada sell potassium salts, and a jar costs 75 cents—a real blessing to fat people.

WORLD HAPPENINGS BRIEFLY TOLD

An inter-provincial conference will be held at Ottawa this autumn to discuss federal and provincial taxation boundaries.

The harbour enquiry to be conducted by Sir Alexander Gibb will include the port of New Westminster as well as that of Vancouver.

No trade agreement with Cuba has been made by the Dominion Government, although Cuba is considering proposals made by Canada.

Dr. Harriet Cloby, who celebrated her 100th birthday last August and was said to be the oldest woman physician in the world, is dead at her home in West Kensington, England.

A world-wide conference on pool equipment and the seeking of remedies was suggested at Leeds, England, by Rt. Hon. J. H. Thomas, Dominion secretary.

The government of France is to have its own legion building in Canada, according to announcement by Hon. C. A. Henry, French minister to Ottawa.

Close to 10,000 Toronto people who have tickets on the Irish Free State Hospital, are expected to receive a chance for a prize. Their tickets have been seized in the mails.

Indian farmers throughout the prairie provinces have sown a larger acreage of wheat this year than in the spring of 1930, according to observations of W. M. Graham, commissioner for Indian Affairs.

Rt. Hon. C. R. Atiles, postmaster-general, informed a questioner in the British House of Commons that the government was not prepared to re-introduce penny postage at an early date.

For the first time in Spanish history women will be eligible to membership in the next election. The government has announced that all citizens, irrespective of sex or profession, may be candidates.

Yale Fellowships

Western Canada Students Have Received Awards

The award of 176 fellowships and scholarships, including Canadian awards, and having a value of more than \$130,000, representing the income from gifts of over \$2,000,000, were announced by the graduates school of Yale University recently. The awards cover the study period of 1930-1931.

William F. Hanna, of Winnipeg, B.A., Dalhousie University, 1924, B.S.C., University of Alberta, 1925, Ph.D., University of Manitoba, 1928, will study the genetic relationship of Tilletia and T. tritici, the fungi causing "bunt" of wheat.

Edith M. Mason, of Victoria, B.C., B.A., King's College, 1918, M.A., Dalhousie University, 1923, wishes to study the life and works of Colleen D'Arville.

Canadian Bond Sales

Canadian bond sales for the year to date amount to \$211,150,380, as compared with \$191,860,721 for the corresponding period of last year, and \$168,814,686 for that of the year before. Purchases by Canadian financial houses made up a total of \$147,260,386, while American firms bought to the extent of \$30,787,000 and British, \$4,100,000.

English girls are adopting the American no-coat idea.

The Cost Of Sickness

Unnecessary Loss Of Life Each Year From Diseases That Could Be Prevented

(By John Burke Ingram.)

One Canadian out of every three dies ahead of his time, statistics show. One death out of every three deaths that bring sorrow to Canadian communities, large and small, could be postponed. We Canadians are letting our friends and relatives die because we do not know how many diseases there are which could be prevented or because knowing, we will not take the trouble, the simple trouble to prevent them. Why are these diseases not prevented?

That is the question which every thinking Canadian should want answered? For centuries disease was inevitable because mankind had not learned how to prevent it. Doctors used to heal the sick, but it was nobody's business to attempt to prevent sickness from occurring because in those days it could not be done.

Then an English scientist named Edward Jenner, discovered vaccination against smallpox. Doctors began to vaccinate people—which meant that doctors began to "trust" "friendly" people, in order to keep them from becoming ill by contracting smallpox. As a result this disease, at one time the greatest scourge of the race, has been beaten down till today it occurs in negligible places among the killers of civilized men.

The success of vaccination made medical scientists think along new lines. If a substance had been discovered which would prevent smallpox, why could not other substances be evolved to prevent other diseases?

The idea was sound. There was a substance which prevents diphtheria, another to prevent typhoid fever, another to prevent scarlet fever, another to prevent lockjaw, another which will prevent infantile paralysis prevent erysipelas.

But though science is in a condition to prevent diseases by these and other means we are not taking advantage of the protection which is offered to us. For centuries we regarded disease as a gift of god, and it is hard to change the thinking habits of a people in one

single generation we will, even most of our leaders, retain this medieval attitude.

And therefore today, Canada's lifeblood is flowing from wounds inflicted upon her by her enemies—disease germs.

Not merely in dollars and cents alone—disease mites as annually—but also in our man-power. Canada needs population. Canada is constantly bringing foreign and other immigrants to our shore, yet she permits her own sons and daughters to die of diseases which could be, and should be, and some day shall be prevented. Diphtheria and typhoid fever, both preventable, take respectively 1,200 and 1,311 lives annually, yet both diseases are preventable! The death rate from tuberculosis has been cut in two in the past 25 years, and could be even with our present incomplete knowledge halved and halved again. Cancer kills almost 8,000 Canadians every year, and despite the fact that we don't know what causes cancer, this death rate could be cut in half if adult Canadians would cultivate the habit of having themselves physically and thoroughly examined by a competent physician every year.

And so all through the pitiful list of diseases which now rob us of our best and fairest—heart disease, maternal mortality, infant mortality, venereal diseases, all can be cut down if men and women will realize that they just exactly the kind of health service that they want and are willing to pay for, and that by helping their public health officials, they may, in some measure, be held responsible for the health of a nation that is too indifferent to help itself.

Divorce By Legislation

The sixth application for divorce in the last 50 years was recently before the legislative council of the Isle of Man. As the island has no divorce law, a special bill must be passed for each case. After the council has passed the bill, it must be passed by the House of Keys, sent to London for royal assent and finally promulgated from the official "Penny Post."

Difference In Force Of Gravity

A body weighing one pound at the earth's surface would weigh 27 pounds at the surface of the sun.

Predicts Stormy Summer

"Chateworth Sage" Bases Conclusions On Purely Scientific Principles

Claiming to have forecasted the weather for the past 14 months, including the extreme dry spell now prevailing, this conclusion, with a most perfect accuracy, J. B. Bows, of Owen Sound, Ont., widely-known as the "Chateworth Sage," has announced his prognostications for 1931. He has relinquished the copyright on his forecasts for the benefit of his many followers all over the Dominion.

Mr. Bows claims that his conclusions are based on purely scientific principles. His expenses are paid by himself. A check-up of his forecast for the last 14 months reveals he prophesied the present dry conditions throughout North America.

His forecast for the next eight months is as follows:

June—Very calm, cool and very dry for three weeks, light weak strong winds and rains.

July—About ten days rain warm. About 15th to 20th, very strong persistent and cool winds, very heavy rains that will cause floods in many places, and in northern localities this storm of wind, light and rain in January, will cause tremendous seas that will be very destructive to life and property.

August—First half very decidedly warm, sultry, with many thunderstorms. Latter half very calm, warm and dry.

September—About the 6th very strong wind, very heavy rains and frost. Last two-thirds of month very warm, calm and dry.

October—About first ten days mild and dry, calm and frost. About 15th strong, cold winds, rains, snow and frost. Balance mild and calm.

November—Calm and cool and probably dry.

December—Very calm and very dry to about the 15th, then very strong winds, heavy rains and snowstorms.

January, 1932—Quite mild and calm for the first two-thirds of month.

Tomatoes As a Diet

Will Be Chief Food For Members Of Wilkes Expedition

When Sir Hubert Wilkes sets forth in the Arctic submergence "Maud" in his expedition to the North Pole, the man in charge of meals for the entire personnel will be Harry Rothchild. When asked what will be the most important item in the under-the-meat menu, Mr. Rothchild is quoted in a news dispatch from New York, N.Y., as responding: "Tomatoes." Mr. Rothchild is insistent in his contention that tomatoes—eaten in salad or in any other form—have an exceedingly invigorating effect upon people who are subjected to long confinement in stale air, as will be the case in this long-heralded under-the-sea expedition to the top of the world.

Mosquitoes never breed in swiftly flowing water.

Wicklow, Ireland, is trying to find means of housing its poor.

Gift For King George

Presented With Valuable Addition To Stamp Collection

King George has accepted a valuable addition to his wonderful collection of postage stamps, an album containing a complete set of the new pictorial postage stamps for the territory of Southwest Africa, together with a series of the issued stamps in unissued, marginal blocks of four, for the royal collection. The presentation was made recently on behalf of the Union Government by the high commissioner for South Africa, C. T. Water. These are the first stamps of definitive design to be circulated in the mandated territory, where up to now over-printed types of the Union itself have been employed. The subjects were obtained in open competition from South African artists, and from photographs, sketches and paintings selected by Colonel J. A. Vennig, director of posts and telegraphs at Windhoek, while the actual engraving and printing has been carried out by Bradbury, Wilkinson and Co., London, and printed at New Malden, Surrey, England.

Recipes For This Week

(By Betty Barclay)

CARROT PUDDING

This is a dessert well liked by those who visit Portugal. It is equally nice served with a pudding sauce or with cream.

- 1 cup butter.
- 1 cup brown sugar.
- 1 egg.
- 1 cup raw carrots, grated.
- 2 teaspoons lemon peel, grated.
- 1 cup flour.
- 1 teaspoon soda.
- 1 teaspoon baking powder.
- 1 teaspoon cinnamon.
- 1/2 teaspoon ginger.

Cream the butter. Add the sugar and slightly beaten egg. Stir in the carrots and grated lemon peel. Mix and sift the dry ingredients. Add to first mixture. Bake in a buttered pudding pan for one hour. Serve hot.

DEEP LEOF

- 1 1/2 pounds round of beef.
- 1 quart cold water.
- 1 tablespoon onion.
- 1 teaspoon sugar.
- 1 teaspoon sage and thyme, mixed.
- 1 tablespoon Worcestershire sauce.
- Salt and pepper.

Simmer the beef in the water with the salt until meat is tender. Cool. Remove bones and fat, and chop very fine. Boil the liquid until reduced to one cup. Add vinegar, sugar, sage, thyme, salt and pepper. Mix with the meat. Press into a buttered mold and leave to become thoroughly cold. Serve with tomatoes and lettuce with mayonnaise.

Icebergs contain no salt, because they are formed of glacier ice which was originally snow.

Illiteracy is deplorable, but it is not as bad as being able to read everything and believing it all.

Eagle Brand...ideal for Summer Feeding

EAGLE Brand is the solution to the numerous difficulties surrounding the feeding of baby. It is the only milk that is so pure, so rich, so sweet, so easy for digestive literature.

CONDENSED MILK

The Borden Co., Ltd.
115 George St., Toronto.
Send for free copy of our pamphlet: "How to feed your baby with Eagle Brand Milk." Write for literature on Infant Feeding.

Canada and Newspaper Production

More Newspaper Made In Canada Than Any Other Country

More newspaper paper is made in Canada than in any other country. In 1930, Canada manufactured 2,504,000 tons, 38 per cent of the world production of newspaper paper. The tonnage was practically double that turned out in the United States, which was the nearest competitor, accounting for about nine per cent. Newfoundland and Japan four per cent each. These six countries accounted for about four-fifths of the world supply of newspaper which totalled 6,975,000 tons last year.

Though Canada's production totalled 38 per cent of the aggregate for the upwards of 20 countries producing newspaper, her proportion of the export market was even larger.

Exhibition For Charity

England's fancy mice exhibition, at St. Albans, England, had more than 70,000 visitors of plain and fancy mice shown by women fanciers. Most experimental, there are few limits to the combinations and cross breeds obtainable. Among the freak results are white mice with black eyes; silver and tan mice; black and tan mice; and mice, extremely rare, a blue mouse. Proceeds from the exhibition are for charity.

By a new decree all tooth pastes must be analyzed, approved and registered by the government before they can be sold in Argentina.

CHAPTER XVII—Continued

"I rather think we are! But you see, a family usually has a daddy and a mother, and more little children, Sonny and Nick, and their father and mother are a family, so you see, you couldn't have Mrs. Hastings for your mother. Do you understand?"

"Not—tactly. Who—who can I have? Could it be Julie?"

Halliday stifled an impulsive smile, and answered: "I'm afraid not; but—"

He seemed to hesitate; then said: "Martha, do you remember a lady who used to live in a very pretty lady, in a blue gown?"

The child looked up, her eyes suddenly wide with distrust.

"She hurted my kittle, she hurted him so hard he runned away."

Halliday drew a deep breath. He had hoped the child had forgotten.

"She will never hurt your kittle again, dear. Would—would she come to live in a—another, little girl?"

"No," said Martha. She slid off Halliday's knee as if this monstrous proposition had put something intolerable between them. She said again, looking up soberly, "she isn't a mother. She won't do."

"Martha, remember, Halliday's kittle, it was all so pitifully true! Then, meeting his eyes, the child's innocent heart surmised that he was hurt, and she flung herself upon him, clasping his neck in a passion of overwhelming love.

"It doesn't matter—much," she comforted. "It doesn't matter hardly any. I've got you, Daddy."

"Yes," said Halliday, huskily, and smiled. "There's not the least doubt in the world that you've got me!"

And next day he went to Boston to see his lawyer.

CHAPTER XVIII.

It was on a day some five weeks later that Nick came back from a morning spent in the office of a native lawyer, and with a sigh of relief dropped into a chair on the hotel veranda. The lawyer had proved slow, and plodding, and exact, to a degree that had made the impatient New Englander long to take him by the collar and shake him up; and the day was hot.

Nick threw down his Panama hat, and mopped his forehead, thankful for the fact that though the tropic sun is hot, the shade is cool. And after week ought to finish up the business. As he sat, there looking out on the grove of palms that had become familiar in the past weeks, he felt torn between a desire to take the first boat home, and a longing to claim his vacation now, and see more of the island and its people.

Gay had urged him to stay as long as he could be spared; and only the day before had come a line from Mr. Maxwell saying not to hurry back. "Take another month, boy, and see all there is to see while you've got the chance. Goodness Bartlett is taking excellent care of your family. You know that good wife of yours really wants you to have a taste of freedom. I wonder, Nick, if freedom is all cracked up to be? You can tell me about it when you come back."

Nick wondered, too. Although he had enjoyed almost every minute of the time, he had, all the way along, missed Gay's companionship. The night of each new beauty brought the wish that she were there to share it.

He wanted her comments on all he saw. He missed her understanding smiles. For if a young marriage proves the right marriage, there is some so happy, because there is less adjusting to go through with. Youth understands it kind—has few habits to overcome—few prejudices.

Nick was hardly conscious of his surroundings that morning. He was thinking that in Bakersville it was spring. Gay's last letter had told of pussy willows, and venturesome robins. The snow was gone. There had been a tremendous thaw and the river road was flooded in low places. It was spring. The bridge at Lower Falls was threatened for a day; and Uncle Sam had hired Sam Hilton to take him in his car to "see the sights."

But Mr. Maxwell's letter worked up, and begged constantly to get into the bath tub and "play golf."

Nick felt a twinge of keen regret that he had not been there to share in the excitement. "I believe I'm a kid as kid as Sonny," he mused quietly. "I have a meaning like for floods, and cirruses, and fires. Presumably, I'll Mr. Maxwell's letter worked up, and begged constantly to get into the bath tub and "play golf."

Nick felt a twinge of keen regret that he had not been there to share in the excitement. "I believe I'm a kid as kid as Sonny," he mused quietly. "So soon? Isn't it foolish not to see more now that you're here?"

It was foolish, Nick told himself that he had known it was foolish even when he made his resolve an hour earlier.

"Perhaps," he answered. "But I ought to get back. This is a business trip on my part, you understand?"

"But they'd let you stay, wouldn't they? In another month you could learn so much about the island. Or you could run down to Panama through the canal to Ancon, or—"

"Don't!" begged Nick, as if thrusting aside temptation. He would be brought up the old magic. It would be wonderful to see those things. Yet—

"You could stay longer, couldn't you?"

He came back to earth at the question.

"Why, of course. It's merely a matter of conscience. I feel that I mustn't impose on Mr. Maxwell just because he's good enough to let me stay. And besides, I've a family to maintain for a day."

"But surely Mrs. Hastings wouldn't begrudge you this wonderful opportunity?"

"I should say not! Perhaps that's the very reason I feel that I should get back to her that sounds odd, but it's the truth. However, it would do harm for me to take an extra week. What ought I to see?"

Angela leaned forward. There was a gleam of victory in her eyes which Nick could not see. He was not discreetly lowered them. When she looked up it was gone, and only their innocent eyes remained.

"I've had in mind a lot lately," Nick said, "I know you're not a kid as kid as Sonny, but I want you to make the most of it. You remember my friends the Myers whom you met at Bakersville?"

"They're about to start a new type of gasoline yacht. They'll go into places the big liners don't touch, and see unusual things. They want me to join them, and—bring a friend along. I wonder if you'd care to be that?"

To Be Continued.

Woman Has Intricate Job

Superior Control Of Truck Traffic In Chicago Tunnels

An interesting illustration of woman's place in the modern world is the appointment of Miss Ruth Hester as the controller of the truck traffic in the tunnels that lead to the Loop district of Chicago. Beneath the most congested business portions of the city, there are six miles of tunnels through which trucks are sent directly to the big stores and warehouses for unloading. For the greater part of the tunnels have but a single track, and it is a difficult problem to arrange a great multitude of trucks to pass in and out of the tunnels before a switchboard which is the central point in a battery of almost 100 telephone lines connected with every part of this network of tracks.

The trucks must not only be sent to their proper destination, but they must be returned over the system of one-way tracks to the particular railway lines from which they have been released. The finest of modern moves the work involved resembles a very elaborate game of chess. By means of her own plan, which she has worked out, Miss Hester is able to keep in close touch with all that is happening in the narrow, winding tunnels, and is far below the streets and skyscrapers of Chicago.

Miller's Women Powder not only makes the inflexible system unbreakable for women, but by their action on the stomach, liver and bowels they correct the complexion and increase the brightness and other internal disorders that the woman craves. Children thrive upon them and the mother who conditions their work—children are made to be their own selves, improvement as soon as the treatment begins.

Will Wash Apple Trade

Plan to extend to growers raised by Ontario apple growers in the British market last season are being made by the provincial department of agriculture. It is planned to increase the trade through improved methods of storage, branding, packing, publicity and overseas marketing operation.

Killer Wants To Know

Seven men were in a grocery store. One was a reporter. Six of the men told the reporter how to run a newspaper, but one told the grocer how to run his store. Why is it that nearly everybody knows how to run a newspaper, and only a few people know how to run a store?

Burlins found at Ur of the Chaldees show that the custom of shaving the head and wearing a wig was known in that ancient city.

Australia will at once spend \$2,300,000 on new highways.

What a lot of fun you can have with Borden's Chocolate Malted Milk. It's a delicious treat for you and your family. It's a healthy drink that's good for you. It's a drink that's good for you. It's a drink that's good for you.

Borden's Chocolate Malted Milk

Rock Of Gibraltar

Ancient Fortification Said To Be In Danger From Crumbling Of

The Rock of Gibraltar, symbol of strength, was reported by geological experts recently, to be crumbling and crumbling.

The principal cause was said to be the shattering effects of the fire of Gibraltar's 12-inch land defense guns. During peaceful practice for years the forts guns have recoiled on the rock and caused the crumbling.

As a fortress the rock has been regarded for centuries as the impregnable in existence. It now carries a gun of large or small caliber on every available niche along its three-mile promontory and the cannon are often constantly concealed behind flowering plants. The approaches from land from the north and from the sea, from the south and south-west also have a guard of particularly powerful batteries, while there are also series of fortified galleries with secret entrances.

As the eastern side is unassailable because of the sheer drop of the 1,400-foot rock, the forts are not powerful there, but the central guns command any approach from the Mediterranean and the Atlantic side. The Straits of Gibraltar are under easy fire.

The geologists who have recently examined the strata of the rock and its foundations say the rock is of Jurassic limestone, resting on a shurian base.

Speculation about what will happen if the rock crumbles more rapidly has led to the conclusion that it could be partly razed and the gun emplacements fixed at sea, solid foundations, thus enabling the fortress to keep its watch over the straits. This would involve an expenditure of millions of dollars.

Why suffer needlessly? Douglas's Erythraeum brings quick relief to scald feet, sores and warts. Relieves inflammation. Removes dead flesh.

Redistribution Bill

Possibility Of Large Cities Receiving More Representation

A general redistribution bill will be introduced in parliament next month or the following. This intimation was made in the House of Commons by Hon. J. H. Munro, Minister of Trade and Commerce.

Political observers foresee the possibility of Toronto obtaining two more seats in the House, Montreal two, Ottawa one, Winnipeg one or two, and Vancouver one or two.

The last general redistribution bill was passed in parliament in 1924. Changes in boundary lines of various provinces and increased population always affect many ridings.

One reason why prayer isn't effective is because people use it as a substitute for brains and elbow grease.

Aching
CORN'S
STOP HURTING
INSTANT
RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. The Putnam's Corn Extractor is a wonderful remedy, and say it is the best. Don't suffer any longer. Use Putnam's Corn Extractor, the one sure relief for corns. Sold at every drug store.

Putnam's

W. N. U. 1880

WHAT CAME BEFORE Captain Jimmy and Scottie are firing over China. They are firing the Japanese between the two sides in their place. Scottie is firing from the Chinese attacks Captain Jimmy.

For a moment I was paralyzed. My eyes attracted me for every man, and I could see the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides. I turned the gun on the road and I saw the road behind the two sides.

Mr. Taylor, of the Imperial bank staff, is spending his holidays at his home. During his absence Mr. Hughes of Brandon is relieving.

A conference of the premiers of the three prairie provinces will be held in Regina this week-end to discuss matters concerning the proposed establishment of a Federal Wheat Board.

At a meeting of the stampede executive held here last week Mr. J. E. Tarrant was elected secretary to replace Mr. A. R. Ballontyne who recently resigned the position. Mr. R. S. Hodge was elected treasurer. A review of plans already made indicate the stampede this year will be in keeping with its past record.
